Schema

Feature

Valve bidirectional complete seal - airtight class.
Valve plate finishing spherical sealing surface, small torque, long service life.
Three self-lubricating bushings on the valve shaft prevent the valve shaft from skewing.
Four flange positioning holes ensure the valve position is correct during installation
Stable quality, long service life.
Improved product performance, making it more suitable for control systems.
Valve passed sulfur dioxide corrosion test and salt spray detection.
The valve operating torque is low, effectively reducing the cost of actuator selection.
maintenance-free
In special industries, non-silicon processing valves can be selected
